

# Municipality Web-Based Public Access

## Enable Parcel Data Access and More Over the Internet

Utilizing the look and feel of your existing website, General Code makes available, via the Internet, information relating to the parcels, permits, inspections, complaints, variances, planning projects, etc. Optionally, web users can submit an application for a new permit, lodge a complaint or request an inspection.

## Features of the Municipality Web Module:

- View parcel information and history
- Apply for permits on-line
  - Take in permit applications
  - Process fees (credit card or check – ACH).  
Fee extra add-in to base required
- Track status of an application
- View status of permits (including inspection progress)
- Request an inspection
